## OVERALL RECOMMENDATIONS

1. HIGH: MFA adoption at 70%. Target 100% MFA coverage.

2. INFO: 71% cloud adoption. Deploy CSPM tools for cloud security posture.
3. Conduct quarterly security audits aligned with your cybersecurity framework.
4. Establish an incident response team with documented playbooks.
5. Implement automated data quality monitoring across all pipelines.
6. Enforce periodic access reviews (minimum quarterly) for privileged accounts.
